## 1. Introduction

#### 1.1 Context

Gateshead Council adopted Planning for the Future Core Strategy and Urban Core Plan for Gateshead and Newcastle upon Tyne (CSUCP) in March 2015. The CSUCP sets out the spatial vision for the future development of Gateshead and Newcastle, and contains strategic objectives and strategic policies that aim to deliver that vision. It also contains more detailed policies and allocations for the Urban Core.

The Making Spaces for Growing Places Local Plan document (MSGP) is being produced by Gateshead Council. Once adopted, MSGP will sit alongside the CSUCP as part of Gateshead's Local Plan. It will provide detailed policies aimed at supporting the Development Management process, and will contain site allocations and designations. The scoping report for MSGP has been consulted upon to obtain views on the extent and content of the document. Draft policies are being developed, and will be consulted upon in 2016.

#### 1.2 Purpose of Report

Under section 19 of the 2004 Planning and Compulsory Purchase Act, a Sustainability Appraisal (SA) must be carried out on any proposals to be included within a local development plan document to ensure that development will take place in sustainable locations consistent with sustainability objectives.

The SA of the 'Making Spaces for Growing Places' planning document will incorporate the Habitat Regulations Test, Equalities Impact and Needs Assessment, Health Impact Assessments and Strategic Environment Assessment in a combined and comprehensive approach.

Consultation with statutory consultees, namely Heritage England, Natural England and the Environment Agency will be carried out and there will be an opportunity for other interested parties and stakeholders to comment on the SA later in the process.

This Scoping Report has been produced as the first stage of the SA process and intends to highlight potential issues and provide the chance for consultation on the direction of the SA at the earliest opportunity.

#### 1.3 Making Spaces for Growing Places

MSGP is to be a statutory development plan document which sets out detailed development and land allocation policies.

Specifically the document is intended to:

- identify and allocate specific areas of land for new development and improvements to existing development.
- identify areas where there may be limitations on development.

- set out policies which provide detail to assist in the guidance on and decisions made on planning applications.
- spatially illustrate land use designations and desired land uses on preferred sites using a land use policies map.

#### 1.4 Sustainability Appraisal (SA)

Sustainable development is considered by Government to be the core principle underpinning land-use planning. Consequently it plays a key role in facilitating proper development in appropriate locations. Local Plans can help to achieve sustainable development by ensuring that the right development is delivered in the right place at the right time whilst meeting the needs of people living and working in the area, and at the same time protecting and enhancing the environment.

The Government considers that an SA can provide a useful tool to help balance the environmental, social and economic needs that can often be conflicting during the plan preparation process.

#### 1.5 Strategic Environmental Assessment (SEA)

Planning authorities must also undertake an SEA in accordance with the Environmental Assessment of Plans and Programmes Regulations 2004 which implement the European Directive 2001/42/EC on 'the assessment of effects of certain plans and programmes on the environment' (the 'strategic environmental assessment' directive or SEA Directive) in England.

The Directive describes the objective of SEA as to 'provide for a high level of protection of the environment and to contribute to the integration of environmental considerations into the preparation and adoption of plans [...] with a view to promoting sustainable development'1.

SEA is focused primarily on environmental effects. The Directive defines environment broadly, including population, human health, cultural heritage and material assets as well as biodiversity, air water and soil. SA examines not only the environmental effects of plans but also the social and economic sustainability effects of them.

#### 1.6 Additional Assessments

Additional assessments that are required to be carried out upon the emerging MSGP include a Health Impact Assessment (HIA), a Habitat Regulations Assessment (HRA) and an Equalities Impact and Needs Assessment (EINA).

It would be more efficient to fully integrate the HIA, the HRA and the EINA into the SA as has been done for the SA of the CSUCP. Government Guidance on integrating Health into Strategic Environmental Assessments confirms that this approach is appropriate<sup>2</sup>.

Article 1 of the Directive 2001/42/EC

<sup>&</sup>lt;sup>2</sup> See: Draft Guidance on Health in strategic Environmental Assessment, Consultation Document, Department of Health, 2007

These assessments require the following stages and can be combined well with the SA:

- agreeing the scope;
- consultation with relevant stakeholders;
- reviewing relevant plans, programmes and strategies;
- determining the key issues;
- gathering baseline information (including literature review of relevant evidence);
- ensuring that the topics are reflected in the sustainability objectives to be used in the appraisal;
- ensuring that key question sets are used in the assessment;
- bringing health and equalities out as relevant sections within the sustainability report:
- developing appropriate indicators;
- inclusion within the monitoring programme.

#### 1.7 The Combined Approach

The requirements to carry out an SA and an SEA would see overlap occurring between the two processes. Government guidance however, does state that it is appropriate to satisfy both requirements through a single appraisal process. In addition it was felt that some elements of the Habitats Regulations Assessment (HRA), Equalities Impact and Needs Assessment (EINA) and the Health Impact Assessment (HIA) can also be met through undertaking the SA.

For the purpose of this report, when referring to the SA, this is in reference to the combined approach by which we are undertaking the assessments.

The SA process can be approached through 5 stages. Some elements of these stages have already been carried out during the SA of CSUCP, for example setting the sustainability objectives, and these will be carried forward in the SA of MSGP.

Table 0 SA Process

Stage of Process	Tasks within each Stage
Stage A Setting out the context and objectives, establishing the baseline and deciding on the scope of the appraisal	A1 – Identifying other relevant policies, plans and programmes and sustainability objectives A2 – Collecting baseline information A3 – Identifying sustainability issues and problems A4 – Developing the SA framework A5 – Consulting on the scope of the SA.
Stage B Confirming the SA Framework	B1 – Test Plan objectives against SA Framework B2 – Refine Plan options B3 – Predict the effects of the Plan B4 – Evaluate the effects of the Plan B5 – Mitigate effects B6 – Monitoring proposals
Stage C Report Production	C1 – Produce the Draft SA Report
Stage D Consultation on the Draft SA Report	D1 – Public participation on Plan options D2 – Appraise significant changes D3 – Produce Final SA Report
Stage E Monitoring	E1 – Monitor implementation of the Local plan Documents

This document encompasses Stages A1-A4 of the SA process, which is displayed in Table 0. To complete stage A of the process, consultation is being carried out on this document to ensure that stakeholders feel that the scope of the appraisal to be carried out is sufficient.

#### 1.8 HEALTH AND EQUALITIES IMPACT ASSESSMENT

It is more efficient to integrate the Health Impact Assessment (HIA) and the Equalities Impact and Needs Assessment (EINA) into the SA rather than treating them as separate studies. Government Guidance on integrating Health into Strategic Environmental Assessment confirms that this approach is appropriate.

HIA is a tool that can be used to assess the health impact of a physical development, a proposed change to service delivery or a policy or strategy. In doing this, it is possible to make practical recommendations as to how negative impacts on health can be minimised and positive health gains can be optimised. It is also possible to consider whether proposed changes will narrow or widen health inequalities. EINA is a systematic process to help services identify where and how proposed policies or existing services could improve the way they serve all members of the community fairly.

The six stages set out below can each incorporate key elements of the HIA and EINA and allow the full assessments to be carried out in an iterative way. Reference is made in key tasks outlined below as to where elements of the HIA and EINA can be fully integrated.

#### 1.9 STRATEGIC FLOOD RISK ASSESSMENT

The SFRA will be used to consider a range of options in the site allocation process, applying the Sequential Test and the Exception Test where necessary. This will feed in to the sustainability appraisal. Where other sustainability criteria outweigh flood risk issues, the sustainability appraisal report will set out the reasoned justification for allocating land in areas at flood risk.

The results of the Strategic Flood Risk Assessment (SFRA) and Surface Water Management Plan (SWMP) will feed into the SA and have been used to determine the baseline conditions.

All Policies and allocations will be assessed according to Sustainability Objective 7B, which states:

"Make sure we adapt to the effects of climate change and mitigate against its impacts in future development"

Under this objective several strategic questions will be asked for each policy assessment, where they are deemed to be relevant:

Are the flood risks (depths and hazards), prior to mitigation, significant, and could result in a risk of loss life to people using the site?

Can the development be made safe once developed and are the residual risks acceptable?

Is the increase in risk posed by climate change easily adapted to and/or can the development build in climate change resilience?

As far as possible, the SFRA and other linked flood studies such as Metrogreen Flood Management Plan and Surface Water Management Plan, forthcoming Metrogreen flood management outline designs and Team Valley Integrated Flood Study will be used to determine the answers to these questions in the assessment.

Can flood risk to adjacent lands stay the same or be reduced as a result of the

development and its mitigation measures?

The SFRA will be updated in 2015: to include potential allocations including waste and minerals, consider the surface water flood risk and SuDS suitability, consider the opportunities for new development to reduce the causes and impacts of flooding, update the Environment Agency's new tidal model (March 2015) and the Environment Agency's Team Valley Integrated Flood Study (Oct 2014) and align with Gateshead Local Flood Risk Management Strategy.

The result of the overall SA in-turn will feed back into the sequential test and exception test for the specific allocations which will be undertaken in advance of the final submission of the Plan. This is an iterative process and was continually updated until the sequential or exception tests for all allocations. The Sequential Test/Exception Test report will be demonstrated in a free-standing document, informed by other evidence base documents such as the Strategic Housing Land and Availability Assessment and Employment Land Review.

# 2. Sustainability Appraisal Scoping

#### 2.1 Context

In undertaking a SA it is important that the proposed methodology and scope of the SA is satisfactory to key stakeholders before the appraisal is undertaken. This scoping report has been collated to inform those consultations.

The document sets out the methodology which is being followed for the SA; summarises the baseline information, which has been reviewed to inform the assessment of sustainability issues, helps in the development of indicators for the SA, and presents the draft proposed framework for the appraisal.

The following organisations are statutory consultees under the Environmental Assessment of Plans and Programmes Regulations 2004:

- Historic England;
- Natural England; and
- The Environment Agency

This document has been distributed to the statutory consultees for comment. The document is also available through Gateshead Council's website <a href="http://www.gateshead.gov.uk/Building%20and%20Development/PlanningpolicyandLDF">http://www.gateshead.gov.uk/Building%20and%20Development/PlanningpolicyandLDF</a> /LocalPlan/SustainabilityAppraisal.aspx

All comments received will be taken into account and if necessary the scope of the assessment will be amended as a result. The amended framework will then be used for the SA of MSGP.

The key elements of Scoping and the approach taken are described below. Each of the key elements (i.e. the review of plans programmes and strategies, the baseline environment, the sustainability issues, and the sustainability objectives) are discussed and presented in relation to the four principal sustainable development themes that have been established for the 'Bridging Document'<sup>3</sup>:

- Economic Growth and Prosperity
- Health and Wellbeing
- Housing and Thriving Neighbourhoods
- Sustainable Quality Places (including Environmental Quality)

The 'Bridging Document' brings together the core aims of the Sustainable Community Strategies of both Gateshead and Newcastle that in turn underpin the key objectives of the Local Plan and any subsequent Local Plan Documents.

#### 2.2. Relevant Plans, Policies and Programmes

 $<sup>^3</sup>$  Developing Sustainable Twin Cities of NewcastleGateshead Part 1, Draft NewcastleGateshead Bridging Document, 2010

Existing plans and strategies will play a role in influencing the development of MSGP and there is a need for them to be reviewed within this context in order to identify and address any inconsistencies and restrictions that may become evident.

A review has already been undertaken within the SA of the CSUCP, and this has been updated for this report. This task included revisiting all of the relevant national, regional and local plans, programmes and strategies that had been previously reviewed and filling in any gaps and updating where necessary their relevance to the Plan and how they contribute to further shaping and informing:

\_\_the baseline situation;
\_\_the sustainability objectives to be used for the appraisal; and \_\_the sustainability issues to be considered.

The relevant plans, policies and programmes are listed in Appendix A.

#### 2.3 Baseline Information

The Baseline information for this document consists of data that is used to inform the sustainability objectives throughout the SA process. This is done by using the baseline information to predict and monitor any future issues and looking at how to deal with them.

Baseline information allows the scoping process to consider the economic, social and environmental characteristics of key locations that are likely to be affected by MSGP.

Again, a baseline study has been completed for the CSUCP SA, which will be updated and which the SA of MSGP will be aligned to.

Sufficient information about the current and likely future status of the plan area has been gathered to:

- provide the basis for predicting and evaluating effects;
- identify sustainability issues in the Gateshead area;
- inform the identification of alternative ways of dealing with these issues:
- inform the development of the SA framework including objectives and indicators;
- inform future monitoring proposals; and
- identify where there may be shortfalls in information.

This information is collated as Appendix B.

#### 2.4 Sustainability Issues

Key sustainability issues which the Local Plan faces have been identified through the process of reviewing relevant plans, policies and documents as well as analysing the baseline information collated. The draft identified issues can be viewed in Table 1.

It is important at this stage that we can identify the sustainability issues that Gateshead is currently facing and recognise those which the SA/SEA will need to address and to

identify how the HIA, EINA and HRA will integrate with the SA assessment to ensure adequate coverage of these topics. Gateshead Council has a clear idea of the key issues relevant to Gateshead and these have been articulated in previous SA/SEA work, such as the CSUCP SA Report.

As the SA process is continued and consultation is carried out at all stages, additional sustainability issues may be identified.

#### 2.5. Developing the SA Framework

The SA framework has been developed through the previous SA work on the CSUCP. It takes into account the needs of health, equalities and strategic flood risk assessments. Reference has also been made to relevant plans and programmes that are identified as part of the baseline review. These objectives provide the "sustainability yardstick" against which the social, environmental and economic effects of the Plan can be tested. The outcome of the appraisals will be fed back and taken into account in the development of MSGP and the policies refined in an iterative way with the overall aim being to deliver more sustainable development. The SA Framework is set out below.

#### 2.6 Objectives, Sub-Objectives and Indicators

The glossary defines the various topics and issues that are captured by each of the sustainability objectives and their associated bullet points. It is intended to act as a checklist of points to be considered, and questions to be asked when appraising objectives and policies within the Plan against each of the Sustainability Objectives/Aims within the Framework.

Possible Indicators

Table 2 SA Objectives

Objectives

rossible indicators					
Sustainability objectives with a social thrust:					
1. Promote strong and inclusive co	mmunities				
<ul> <li>□ Work with local communities to promote existing and develop future opportunities</li> <li>□ Listen and respond to communities, encouraging participation in local decision making</li> <li>□ Decrease opportunities for crime and fear of crime</li> <li>□ Tackle the causes of deprivation and narrow the inequality gap</li> <li>□ Ensure everyone has the opportunity of living in a decent, suitable and affordable home</li> </ul>	<ul> <li>5 year housing land supply achieved and sustained.</li> <li>Delivery of more family housing.</li> <li>Improved choice of homes.</li> <li>Less empty properties.</li> <li>Number of adaptations completed to meet the needs of specific groups.</li> <li>Percentage turnover of housing stock.</li> <li>Number of new homes by tenure and type.</li> <li>Number of housing sites ready to develop.</li> <li>Net supply of new homes.</li> <li>Affordable homes completions.</li> <li>Number of vulnerable households living in sub-standard accommodation.</li> <li>Resident satisfaction with homes – residents survey</li> <li>Rank of health deprivation and disability score – indices of deprivation</li> <li>Affordable homes completions (including social, affordable and intermediate rented, and shared ownership)</li> <li>Number of lifetime homes built</li> <li>Number of wheelchair accessible homes built</li> <li>Overall level of failure of HHSRS</li> </ul>				
2. Ensure that equality, diversity an development	d integration are embedded in all future				
☐ Listen to and meet the needs of all in the community	<ul> <li>Improved resident satisfaction with home and local area.</li> <li>Increased choice of suitable accommodation</li> </ul>				

☐ Ensure equal access to essential services and facilities ☐ Accommodate and integrate our diverse communities ☐ Promote development that creates conditions for supporting well-being and happiness in all communities	for the elderly population and those with special needs.  Improved standards in the private rented sector.  Reduced turnover of low demand housing stock.  Reduction in repeat homelessness.  Numbers of new homes delivered that meet or exceed minimum space standards.  Percentage of homes meeting the Health and Housing Safety Rating System (HHSRS) standards.  Rank of health deprivation and disability score – indices of
3. Improve educational achievemen	nt and skill levels across Gateshead
☐ Improve educational achievement and	Increased educational achievement (all levels)
create opportunities for education, training and lifelong learning  Develop and retain a skilled workforce	Increased employment in total, and as a %age of the working age population
☐ Address barriers that prevent people from getting work	Proportion of working age population qualified to at least NVQ level 3 equivalent - nomis
4. Improve health and well-being ar	nd reduce inequalities in health
☐ Improve access to essential healthcare and social services provision	Number of A5 uses per 1000 population Reduction in stress
☐ Promote healthy urban planning (healthy settings, reducing stress)	Reduction in obesity
☐ Provide access to safe and stimulating open spaces and the natural environment	Increase in active lifestyles
☐ Promote healthy lifestyles and active living (walking, cycling, sport, exercise, active recreation, equitable access to healthy foods) ☐ Improve the quality of housing to enable individuals to live healthily and independently.	Rank of health deprivation and disability score – indices of deprivation  Adult participation in sport - % active people survey sport England Reduced excess winter deaths Reduced admissions to hospital Reduced demand on DFG budgets HHSRS data
5. Promote, enhance and respect ou	<u> </u>
☐ Protect and enhance historic and cultural assets and promote a quality and stimulating urban environment	Reduction in buildings at risk on register  Enhancement of conservation areas
☐ Encourage engagement with and access to culture and heritage	Maintenance of Local List
☐ Protect and enhance the historical	Loss of heritage assets
integrity, quality and diversity of Gateshead townscape	
6. Ensure good accessibility to jobs	, facilities, goods and services
☐ Ensure good access to jobs, facilities,	Increase in public transport patronage – Nexus
goods and services	Cycle trips – LA transport team

### 2.7 Monitoring

The SA objectives will be monitored using the indicators and baseline data, through the Annual Monitoring Report. Mitigation measures that are recommended in the SA report will also be monitored. A Monitoring Framework has been established in the CSUCP and this will be carried through into the monitoring of MSGP.

#### 2.8 APPRAISAL OF THE EFFECTS OF THE PLAN POLICIES

Assessing the Effects of the policies

The SA framework will be used to predict the potential effects of each policy in social, environmental and economic terms. Best practice guidance on evaluation will be followed and include an assessment of the likely effects on people and the natural and cultural heritage as well as considering wider sustainability issues. Effects will be considered in terms of their scale and the sensitivity of the resource, whether the effects are positive or negative, direct or indirect and whether there is potential for synergistic or cumulative effects to accrue. Whenever the potential for significant sustainability effects is identified the potential for mitigation will be considered. As the appraisal becomes more detailed checks will be made of the interactions between policies in the Plan and the potential for conflict.

#### Methodology

Dallay VV

The assessment of policies and sites will be made using the matrices below. The assessments will principally be carried out by the Spatial Planning and the Environment Team, after an initial assessment is made, where a neutral or negative implication is ascertained, this will be referred to a specialist focus group. This focus group will be made up of various specialists within the Council and also the Environment Agency, Historic England and Natural England will be invited to attend.

Appraisals of policies and sites will be made on the options and draft policies before a final report is written on the submitted policies and sites.

Summary			

## **Table 4 Appraisal Matrix for Housing Land Allocations**

1. Promote strong and inclusive communities.  □ Does the site provide the opportunity of living in a decent, suitable and affordable hom? □ Is the location likely to attract people to stay and work in the area? □ Does the site have the potential to support a wider integrated sustainable community? □ Does the development of the site have potential through good design to discourage antisocial behaviour and the incidence of crime? □ Does the site provide requal access to design to discourage antisocial behaviour and the incidence of crime? □ Does the site provide requal access to design to discourage antisocial behaviour and the incidence of crime? □ Does the site provide requal access to design to discourage antisocial behaviour and the incidence of crime? □ Does the site provide equal access to descend the difference of the color munity in puts to decision making? □ Does the site provide equal access to descend the difference of the color munities? □ Does the site provide equal access to descend the color munities? □ Does the site provide equal access to escential services and facilities (including shops and transport): □ Does the site provide equal access to descend the provision of additional facilities and services? □ Does the site create conditions for supporting well-being and happiness in all the site provide the obusing for a range of needs and integrate those with such needs (e.g., the elderly) in to the community? □ In the site provide the obusing for a range of needs and integrate those with such needs (e.g., the elderly) in to the community? □ In the site provide equal access to earby primary and secondary schools or will additional provision be required and well-being and reduce inequalities in elation to established provision and well located in relation to established provision be required en infrastructure? □ Does the site have adequate access to nearby healthcare facilities or will additional provision be required erea in frastructure? □ Does the site provide equal access to essential services a	Sustainability Objective	Indicative Housing Land Questions
Six the location likely to attract people to stay and work in the area?   □ boes the six the whe potential to support a wider integrated sustainable community?   □ boes the development of the six have potential through good design to discourage antisocial behaviour and the incidence of crime?   □ boes the development in the incidence of crime?   □ boes the six provide the opportunity for community inputs to decision making?   □ boes the six provide the opportunity for community inputs to decision making?   □ boes the six provide the opportunity for community inputs to decision making?   □ boes the six provide equal access to essential services and facilities (including shops and transport)?   □ will it generate a requirement for the provision of additional facilities and services?   □ will it generate a requirement for the provision of additional facilities and services?   □ will it generate a requirement for the provision of additional facilities and services?   □ will it generate a requirement for the provision of additional facilities and services?   □ will it generate a requirement for the provision of additional facilities and services?   □ will it generate a requirement for the provision of additional facilities and services?   □ will it generate a requirement for the provision of additional facilities or will additional provision of additional facilities or will additional provision of additional facilities or will additional provision be required?   □ boes the six it explains a provision of additional facilities or will additional provision be required?   □ boes the six it is made and protect the historical integrity, quality and diversity of Gateshead's towners and protect the historical integrity, quality and diversity of Gateshead's towners and protect the historical integrity, quality	Promote strong and inclusive communities.	☐ Does the site provide the opportunity of living in a decent, suitable and affordable
Does the site have the potential to support a wider integrated sustainable community?   Does the development of the site have potential through good design to discourage antisocial behaviour and the incidence of crime?   Does the provide the opportunity for community inputs to decision making?   Does the site provide the opportunity for community inputs to decision making?   Does the site provide development help to regenerate derelict land and make use of previously used buildings, which are associated with the local community?   Use of the provide equal access to essential services and facilities (including shops and transport)?   Will it generate a requirement for the provision of additional facilities and services?   Is the location likely to attract and accommodate people from diverse communities?   Will it site provide housing for a range of needs and integrate those with such needs (e.g., the elderly) in to the community?   Some provision of the provision of the provision of additional provision be required, and will that be provided?   Is the site provide housing for a range of needs and integrate those with such needs (e.g., the elderly) in to the community?   Can the site be dequately served by nearby primary and secondary schools or will additional provision be required, and will that be provided?   Is the site easily accessible by sustainable forms of transport and well located in relation to established green infrastructure?   Does the site have adequated served by walking and cycle routes?   Is the site easily accessible for people who are disabled and/or elderly?   Is the site easily accessible for people who are disabled and/or elderly?   Is the site easily accessible for people who are disabled and/or elderly?   Is the site easily accessible for people who are disabled and/or elderly?   Does the site enance and protect the historical integrity, quality and diversity of Gateshead's townscape?   Does the development encourage engagement with and access to culture and heritage?   Does the devel	-	home?
Community?   Does the development of the site have potential through good design to discourage antisocial behaviour and the incidence of crime?   Does the provide the opportunity for community inputs to decision making?   Does the provide the opportunity for community inputs to decision making?   Does the provide the opportunity for community?   Does the provide development help to regenerate derelict land and make use of previously used into the total community?   Does the site provide equal access to essential services and facilities (including shops and transport)?   Will it generate a requirement for the provision of additional facilities and services?   Does the site create conditions for supporting well-being and happiness in all communities?   Will the site provide housing for a range of needs and integrate those with such needs (e.g. the elderly) in to the community?   Will the site provide housing for a range of needs and integrate those with such needs (e.g. the elderly) in to the community?   Will the site provide housing for a range of needs and integrate those with such needs (e.g. the elderly) in to the community?   Will the site provide housing for a range of needs and integrate those with such needs (e.g. the elderly) in to the community?   Will the site provide housing for a range of needs and integrate those with such needs (e.g. the elderly) in to the community?   Will the site provide needs and will that be provided?   In the site easily accessible and well served by walking and cycle routes?   Is the site easily accessible and well served by walking and cycle routes?   Is the site easily accessible and well served and well forced in relation to established green infrastructure?   Does the site have adequate access to nearthy healthcare facilities or will additional provision be required, such as a such		$\square$ Is the location likely to attract people to stay and work in the area?
□ Does the development of the site have potential through good design to discourage antisocal al behalone of crime? □ Does the site provide the opportunity for community inputs to decision making? □ Does the site provide the opportunity for community inputs to decision making? □ Does the site provide the opportunity for community inputs to decision making? □ Does the site provide the opportunity for community? □ Does the site provide the opportunity for community? □ Does the site provide development help to regenerate derelicit land and make use of previously used buildings, which are associated with the local community? □ Does the site provide equal access to essential services and facilities (including shops and transport)? □ Will it generate a requirement for the provision of additional facilities and services? □ Is the location likely to attract and accommodate people from diverse communities? □ Does the site location likely to attract and accommodate people from diverse communities? □ Does the site versive of unusing for a range of needs and integrate those with such needs (e.g., the elderly) in to the community? □ Can the site adequately served by nearby primary and secondary schools or will additional provision be required, and will that be provided? □ Is the site easily accessible and well-seven by walking and cycle routes? □ Dess the site assily accessible by sustainable forms of transport and well located in relation to established green infrastructure? □ Does the site have adequate access to nearby healthcare facilities or will additional provision be required? □ Is the site easily accessible for people who are disabled and/or elderly? □ Dess the site enhance and protect the historical integrity, quality and diversity of gateshad's townscape? □ Does the site enhance and protect the historical integrity, quality and diversity of gateshad's townscape? □ Does the site enhance and protect the historical integrity, quality and diversity of gateshad's townscape? □ Does the site enhance and protect the his		$\square$ Does the site have the potential to support a wider integrated sustainable
antisocial behaviour and the incidence of crime?    Does the provide the opportunity for community inputs to decision making?   Does the proposed development help to regenerate derelict land and make use of previously used buildings, which are associated with the local community?   Does the site provide equal access to essential services and facilities (including shops and transport)?   Will it generate a requirement for the provision of additional facilities and services?   Step to the site create conditions for supporting well-being and happiness in all communities?   Ones the site create conditions for supporting well-being and happiness in all communities?   Will the site provide housing for a range of needs and integrate those with such needs (e.g., the elder) in to the community?   A improve educational achievement and skill levels across additional provision be required, and will that be provided?   A improve health and well-being and reduce inequalities in health.   Is the site easily accessible and well-served by walking and cycle routes?     Is the site easily accessible and well-served by walking and cycle routes?     Is the site easily accessible forms of transport and well located in relation to seasons adequate access to nearby healthcare facilities or will additional provision be required? 	<ul> <li>☐ Is it located close to transport links and areas of employment?</li> <li>☐ Does the development promote investment in sustainable leisure and tourism?</li> <li>☐ Does the development raise Gateshead's national and international profile?</li> </ul>
11. Improve access to a stable and sustainable employment market	☐ Is the site well located in relation to main centres of population, housing, employment and other commercial developments? ☐ Does the site provide appropriate, accessible, diverse and plentiful employment opportunities? ☐ Does the development contribute towards reducing worklessness? ☐ Does the development support small-medium enterprises and business start-ups?

#### **Have Your Say**

The Scoping report is out for consultation for 5 weeks commencing 24<sup>th</sup> September. If you would like to make comments on the report please do so by 30<sup>th</sup> October by writing to Spatial Planning and Environment Development and Public Protection Communities + Environment Gateshead Council Civic Centre Regent Street Gateshead NE8 1HH

Or LDF@Gateshead.gov.uk

#### **Next Steps**

Following the consultation on the scoping report the appraisal process of the emerging policies within MSGP will occur. Further consultation on the appraisals will take place during the progression of MSGP. The Council website will provide updates in the process. <a href="http://www.gateshead.gov.uk/Building%20and%20Development/PlanningpolicyandLDF/LocalPlan/LocalDevelopmentFrameworks.aspx">http://www.gateshead.gov.uk/Building%20and%20Development/PlanningpolicyandLDF/LocalPlan/LocalDevelopmentFrameworks.aspx</a>

European Directive 2000/60/EC Water Framework (EC, 2000)	Prevent deterioration in and protect the status of surface water and groundwater bodies		
European Directive 79/409/EEC 1979 on the Conservation of Wild Birds (EEC, 1979)	To protect all wild birds, nests, eggs and habitats within the EC		
European Landscape Convention (COE, 2000) Conserve landscape The Habitats Directive (Directive 92/43/EEC) (1992)	The primary objective of the Habitats Directive is to protect natural habitats and other species of wild plants and animals		

**Table A2: National** 

Document	Key Theme	
Economic		
National Planning policy Framework (NPPF)	Sustainable development. Economic Viability, Boosting Housing Supply, Meeting objectively assessed needs	
National Planning Practice Guidance (NPPG)	Economic Viability, Boosting Housing Supply, Meeting objectively assessed needs	
Fixing the foundations: creating a more prosperous nation July 2015	15-point plan that the government will put into action to boost the UK's productivity growth, centred around two key pillars: encouraging long-term investment, and promoting a dynamic economy.	
Building a Greener Future: Policy Statement (DCLG 2007)	Outlines policy on moving towards zero carbon development	

The Future of Transport White Paper (2004)	To promote and actively encourage sustainable transport
Good Practice Guide on Planning for Tourism (DCLG 2006)	Ensure that planners understand the importance of tourism when preparing development plans and taking planning decisions
Local Development Frameworks – guidance on Sustainability Appraisal (Planning Advisory Service 2007)	To support councils undertaking a sustainability appraisal (SA) of their development plan documents
Planning for a Sustainable Future: White Paper (May 2007)	Sets out detailed proposals for reform of the planning system to make it speedier, more responsive and inclusive
Securing the Future - UK Government sustainable development strategy	Sets out the Government's overarching objectives for sustainable development in the UK
So	cial
UK Fuel Poverty Strategy (DTI, 2001)	Seeks to set in place a framework to ensure that the number of households in the UK in fuel poverty is consistently reduced to a target of zero.
NPPF	States that planning system can play an important role in facilitating social interaction and creating healthy, inclusive communities. Local planning authorities should create a shared vision with communities of the residential environment and facilities they wish to see.
Home Energy Conservation Act (HECA) (HMSO,1995)	An Act to make provision for the drawing up of local energy conservation reports in relation to residential accommodation
Draft Guidance on Health in strategic Environmental Assessment, Consultation Document (Department of Health 2007)	Provides a step-by-step guide to the incorporation of health impact assessment into Sustainability Appraisal and spatial planning as a whole.
Enviro	nmental
Air Quality Strategy for the UK (2007)	Sets out a way forward for work and planning on air quality issues
UK Biodiversity Action Plan (BAP) (DEFRA,1994)	Establishes a series of 78 species and 10 habitat action plans and recovery targets for the most threatened farmland species and habitats.
Working with the Grain of Nature: A Biodiversity Strategy for England (DEFRA, 2002)	Provides further detail on how the UKBAP priorities can be achieved and how biodiversity should be included in development.
NPPF	Provides a national framework for a range of environmental topics including Flood risk, Water quality, Heritage, Natural Environment, Climate Change

Sustainability Appraisal of Regional Spatial Strategies and Local development Documents (ODPM 2005)	Guidance on how to carry out a sustainability appraisal for regional spatial strategy revisions and local development frameworks.
Biodiversity 2020 (August 2011) - A Strategy for England's Wildlife and Ecosystem Services	Strategy to guide conservation in England over the next decade, including setting an ambition to halt overall loss of biodiversity by 2020, and in the longer term, move progressively from a position of net biodiversity loss to net gain.
The Historic Environment: A Force for Our Future (DCMS, 2001)	Conserve the historic environment for future generations
The National Planning Policy for Waste (October 2014)	Provides a clear framework to enable waste planning authorities to work collaboratively and to identify what sort of waste facilities are needed and where they should go, while also protecting the local environment and local amenity by preventing waste facilities being placed in inappropriate locations. The new policy reiterates the need to drive waste management up the waste hierarchy and strengthens and underlines the Government's commitment to protecting the Green Belt from inappropriate development, bringing it into line with the NPPF.
Waste Strategy for England and Wales (DEFRA, 2000)	Minimise waste in England and Wales so to reduce the negative environmental impacts
Water Resources for the Future: A Strategy for England and Wales (2001)	Conserve water resources in England Wales for future generations
UK Programme for Climate Change (DETR, 2000)	Preparation to address the potential climate change impacts
The Nottingham Declaration on Climate Change (DETR, 2000)	Preparation for climate change impacts
Environmental Quality in Spatial Planning (English Heritage, 2005)	Consider environment in spatial planning
Energy White Paper - Our Energy Future - Creating a Low Carbon Economy (DTI, 2003)	This white paper sets out a strategy for the long term reduction in CO2 in industry and domestically
The Rural Strategy (DEFRA, 2004)	Sets out the Government's approach to policy delivery in rural areas.
Landscape Character and Assessment Guidance for England and Scotland, Countryside Agency and Scottish Natural Heritage (2002)	Guidance on how to identify and express the different elements of landscape, such as woodlands, hedgerows, moors, mountains and farmland, building styles, and historic artefacts, which give a place its unique character.
NPPG	Provides a national guidancefor a range of environmental topics including Flood risk, Water quality, Heritage, Natural Environment, Climate Change

Table A3: Regional

Document	Key Theme		
Economic			
Local Transport Plan Tyne and Wear (Local Transport Plan Core Team 2009)	Contains plans relevant to transportation and transport development in the Tyne and Wear area		
Building a Healthy and Productive Labour Market: The framework for Regional Employment and Skills Action (FRESA) in the NE (FRESA NE, 2002)	Enhance job market and build on existing training		
Building in Sustainability: A Guide to Sustainable Construction and Development in the North East. (Sustaine, 2003)	Ensure construction is sustainable in the North East		
North East Tourism Strategy 2005-2010 (ONE NE and NE Tourism Board, 2004)	Promote tourism to the benefit of the north east economy		
The Integrated Regional Framework for the North East: Achieving a better Quality of Life (Sustaine, 2004)	Improving quality of life for all: Part 1 - Setting the Scene, Part 2 - First annual monitoring report, Part 3 - Integrated Regional Matrix		
Here Today Here Tomorrow' Gateshead's Local Agenda 21 Strategy (2001)	Ensure sustainable development of the region		
Moving Forward - The Northern Way First strategy report (The Northern Way Steering Group, 2004)	A 20 year strategy to transform the economy of the north of England		
Soci	cial		
Building Bridges Newcastle Gateshead Cultural Strategy 2002-2012 (NCC & Gateshead Council,2002)	Promote the unique and diverse culture of Newcastle and Gateshead		
North East Sports Strategy 2001-2006 (NorthEast Sport, 2001)	Promote sport and healthy lifestyles in the North East area		
Turning Ambition into Reality - The North east Regional Plan for Sport and Physical Activity2004-2008 (Sport England, 2004)	The promotion of sports and healthy lifestyles		
More and Better Jobs: A Strategic Economic Plan for the North East (NELEP, 2014)	Sets out vision and objectives to deliver more and better jobs in the North East Economy by 2024		
Environment			
North East Strategy for the Environment (consultation draft) (NEA 2007)	Environmental protection and enhancement in the north east region		
Regional Forestry Strategy - Trees, Woodlands, Forestsand People (NEFAG, 2005)	Protection of trees and wooded areas for environmental as well as social benefit		
Natural Commitment: Working together for wildlife in the North East. (English Nature/GONE, 2003)	Wildlife protection in the North East area		
North East Climate Change Adaptation Study (Sustaine 2008)	Study into the preparation needed for climate change impacts		
A Biodiversity Audit of the North East (Biodiversity Forum, 2001)	Provides an overview and detailed statistics on the regions biodiversity		

Biodiversity Indicators and Targets for the NE of England (North East Biodiversity Forum, 2004)	Protect biodiversity through the use of indicators and targets in the North East of England
Action for Change, Strategy for Sustainable farming and food in the NE Region (GONE,2003)	Sustainable farming and food production in North East England
And the Weather Today isThe Regional Climate Change Impact Study (Sustaine, 2002)	Prepare for climate change and addressing the potential impacts
Impacts of Climate Change in the North East (Friends of the Earth 2004)	Prepare for climate change impacts in the North East
North East Renewable Energy Strategy (RANE, 2005)	Improve renewable energy provision in the North East region
Towards a Waste Management Strategy for the North East (NEA, 2003)	Improve waste management
Tyne Gorge Study Summary Document (SPG6) (Gateshead Council, 2004)	Controlling the design of development in the Tyne Gorge
Durham Biodiversity Action Plan (1999, reviewed 2007)	Biodiversity action plan covering area between Tyne and Tees. Contains species and habitat action plans for priority species and key habitats.
Historic England, Heritage at Risk Strategy	Provides baseline understanding of heritage assets at risk

Tyne and Wear Local Transport Plan 2006-2011 (Tyne and Wear Local Transport Partnership 2005)	Sustainable transport provision for the region at the strategic level
Gateshead Local Agenda 21 Strategy – 'Here Today, Here Tomorrow' (2007)	Sets a framework for integrating the principles of sustainable development into the day to day working of the Council and its partner organisations
Gateshead Sustainable Modes of School Travel Strategy (August 2008)	Sustainable transport to schools in the region
Gateshead Cultural Strategy 2005-2010 – 'Spreading Our Wings'	Cultural development in the Gateshead region
Park and Ride Strategy (Nexus 2004)	Provision of park and ride facilities
Gateshead Corporate Plan	Lays out Gateshead council's priorities and action to achieve Vision 2030
Gateshead Cultural Strategy Action Plan 2005- 2007	Focuses on growing cultural life of the area and integrating the communities that make up Gateshead
'Fit for a City' – Gateshead Centre Regeneration Delivery Strategy (December 2008)	City centre regeneration strategy

Gateshead Housing Strategy 2013-18	To ensure that every person who lives, or would like to live, in Gateshead can access and remain in a home that meets their needs, free from harm or harassment, irrespective of what stage of life they are at. Maximising the contribution of housing to wider economic growth, personal health and well being.
Soci	CIAI
Gateshead Social Inclusion Strategy	Sets out the vision that all residents of the borough have an equal chance to succeed in life
Equality and Diversity in the North East, A Statistical Profile (Northumbria University 2008)	Presenting statistical figures for the equality and diversity of the north East
Gateshead Play Strategy 2007-2010	Summarises the key objectives to achieve, bringing together children, families, professionals and communities
Gateshead Cycling Strategy	Ensure that Gateshead accommodates cycling interests and promotes this mode of transport
Gateshead Social Care & Involvement Strategy	This strategy aims to build on our previous work and to help to develop a more consistent approach to continuing involvement
Gateshead Social Care & Involvement Strategy Action Plan	Social well-being, care and community involvement
Safer Gateshead Partnership Plan (Safer Gateshead 2009)	Gateshead Council is working in partnership with the police and a number of other agencies to improve the local area
Gateshead Cohesion Strategy 2008-2011	To improve community cohesion in Gateshead
Gateshead Equality Strategy 2006-2010	Community equality for priority groups in Gateshead
Gateshead Draft Parking Strategy	Ensure that there is adequate parking provision in Gateshead
Gateshead Fuel Poverty Strategy 2001-02	Tackling the issue of fuel poverty so that individuals at risk can be aided
Gateshead Fuel Poverty Strategy addendum 2004	Addendum to the above strategy tackling fuel poverty
Gateshead Preventing Homelessness Strategy 2013-18	Reducing homelessness issues within the community of Gateshead
Enviror	nmental
Gateshead Assessment of Open Space provision (prepared by White Young Green 2006)	Analysis of the levels of provision of open space within the Gateshead area
Gateshead council (2006) Gateshead Draft Open Spaces Strategy	Open space provision and protection strategy

Joint Municipal Waste Management Strategy (South Tyne & Wear Waste Management Partnership 2007)	Sustainable waste management in South Tyne & Wear
Gateshead Council (2013) Gateshead Contaminated Land Strategy	The reclamation and remediation of contaminated land within Gateshead
Gateshead Strategic Partnership (2007) Climate Change – We Need to Talk About It	Preparation for the effects of climate change encouraging dialogue and preparation for the impacts
Gateshead Climate Change Strategy	Strategy demonstrating how Gateshead are preparing for the impacts of Climate Change
Gateshead Strategic Partnership Climate Change Discussion document	Discussion document on Gateshead's preparation for the impacts of climate change
Gateshead Flood Risk Management Strategy (2015)	This document identifies the strategies, measures and techniques Gateshead Council intend to use to mitigate risks from flooding.
Gateshead ecological evidence base (J.L. Durkin, 2008 & 2009)	A review of all Local Wildlife Sites (formerly SNCIs), and of the Wildlife Corridor network.
Green Infrastructure Study (evidence base) of Gateshead & Newcastle (Entec Jan. 2011)	Summary of existing condition of GI resource – stage 1 of 3 stage GI process.
Green Infrastructure Strategy (Report) of Gateshead & Newcastle (Entec Aug. 2011)	Strategy drawing upon findings of evidence base to identify priorities – stage 2 of GI process.
Gateshead Green Infrastructure Delivery Plan (Gateshead Council, Dec. 2012)	Delivery Plan comprising key projects identified in the Strategy – stage 3 of GI process.

**Appendix B: Baseline Information** 

	Figure	Trends	Comparison	Source
		Gateshead's population has increased from low of the early 1990s.	Gateshead accounts for around 18% of the Tyne and Wear population, and around 10% of the population of Tyne and Wear + Northumberland + Durham.	ONS Mid-year population estimates 2013
L.	Gateshead's population was 200,000 in mid-2013	Population projections prepared for the emerging Local Plan indicate Gateshead's population will grow by around 13,600 residents between 2010 and 2030.	Projected growth in Gateshead accounts for around 7% of projected growth in the NELEP (ONS 2011-based Interim projections)	Preferred population growth scenario, St Chad's College, Durham University, 2013
Population	Proportion of total  2001 2013 2030  0-19 24% 22% 22%  20-64 58% 59% 56%  65+ 17% 19% 22%	Projections (produced for the Local Plan) indicate a 3% point increase in the proportion of residents over 64 years of age by 2030 – this follows a national trend of an ageing population.  The size of the 20-64 age group is projected to decrease marginally, by around 100 persons between 2010 and 2030.	ONS population projections show more modest population growth in the North East region compared to England as a whole, however, the trend towards an ageing population, and shrinking proportion of working age residents is broadly consistent across different geographic scales.	ONS population estimates and projections, Population and economic growth projections, St Chad's College, 2013
	2.13million sqm floorspace (58% of premises) of Gateshead's employment space is Industrial, 271,600 sqm (42% of premises) is Offices		Gateshead has the second highest number of office units in Tyne and Wear, but is a distant 4 <sup>th</sup> in terms of office floorspace.	Gateshead ELR 2010
#	16% of employment land in Gateshead is vacant: 20% of offices, and 13% of industrial land.		Vacancy in Gateshead is higher than in Newcastle, South Tyneside, or Sunderland, and is higher than the c10% that is typical of normal market conditions.	Gateshead ELR 2012
Employment	There were 25.5 active businesses per 1,000 residents in 2012	Only modest change since 2004 (24.2 active businesses per 1,000 residents)	Gateshead has a higher number of active businesses that Tyne and Wear (23.5 businesses per 1,000 pop), but considerably lower than the England total (38.7)	ONS Business demography (2012)
Επ	In 2012, the number of enterprise births was 575, compared to 595 deaths	Business births are down considerably from pre-recession peak (755 births/495 deaths in 2007), but have recovered slightly in recent years. Business deaths remain high	Gateshead's 2.9 births per 1,000 residents is significantly lower than England's 4.5 births per 1,000 residents	ONS Business demography (2012)
	In 2011 9.7% of employed people in Gateshead are self employed		Gateshead is among the bottom 3% of English local authorities in terms of the % of self-employed workers. The comparable national figure is 14%	ONS self-employed workers in the UK 2014
	Office unit availability	Rental levels necessary to support viable development are not being achieved and together with high construction costs very limited new stock is being built resulting a critically low level of available industrial stock across the North East, holding back growth in both office and industrial sectors being held back. Public intervention continues to be an essential part of the business case to support speculative development.	There is understood to be less than 3 years' supply remaining across Newcastle and Gateshead urban core based on historic and current take-up rates	Market feedback.

	Office rental £ per ft	Headline rents are understood to be in the order of £14-15 psf for Grade A office accommodation.	Headline rents for Grade A in Newcastle City Centre during 2014 topped at £21.50. Lettings at Cobalt and Quorum Business Parks were in the region of £16 psf	Office Demand Study March 2015
Retail	In Gateshead there is 224,300 sq m of retail floor space. 168,900 sq m of this floor space is that of the MetroCentre.  Distribution of shopping floorspace (A1) Town Centre: MetroCentre: District and local centres: Out of town:  Percentage of vacant shopping floorspace (A1) Town Centre: MetroCentre: District and local centres: Out of town:	Town 37,000 13% District 34,966 12% Local 18,022 6% Metrocentre 148319 51% Out of Town 51,289 18% 289,596  VACANCY  Town 4370 24% District 3481 19% Local 1223 7% Metrocentre 9218 50% Out of Town 0 0% 18292	Vacancy rate in Gateshead Centre of 12.1% compared to a national vacancy rate of 10.1%	Gateshead Key Facts 2011     Available at: http://www.twri.org.uk/ww wfileroot/twri/twri KeyFact s_gateshead Feb11.pdf Gateshead Retail Surveys (2014)  Gateshead Retail Health Checks October 2014 (draft)  Springboard vacancy rate data July 2014  Gateshead Retail Surveys (2014)  Gateshead Retail Health Checks October 2014 (draft)
ucation	9.6% of Gateshead working age residents have no qualifications and 27.8% have poor skills (below level 2).	% of working age residents with no skills has declined in recent years, following national and regional trend	Education         North East         GB           No Skills         10.3%         9.3%           Below Level 2         29.6%         27.5%	NOMIS data on qualifications (Dec 2013)
Qualifications and Education	35% of Gateshead's residents are employed in Standard Occupation Classification (SOC) groups 1 to 3 (managers and professionals). Gateshead has a higher proportion of mid-low skilled workers than the GB average.		SOC         Ghd         N. East         GB           1-3         35%         36.9%         44.5%           4-5         23%         24.3%         21.4%           6-7         22.7%         19.5%         17.1%           8-9         19.2%         19.3%         17%	ONS annual population survey (NOMIS) March 2014
Qual	At the end of 2013, 7.2% of Gateshead's 16 to 18 years olds were not in education, employment or training (NEET)		North East: 7.6% England: 5.3%	Connexions Activity Surveys  – November 2010 - Gateshead Council / LSC LMS
Income	22,100 people (17.3% of the 16-64 population) were claiming benefit in Feb 2014	% of claimants in Gateshead has fallen since early 2000s, although there was an increase following recession of 2008.	North East: 17.6% Great Britain: 13.3%	NOMIS, Out of work benefit claimants - working age client group – Feb 2014
ln	In 2013 mean Annual Gross Pay was £21,481 for people working in Gateshead		North East: £19,900 Great Britain: £22,000	Annual Survey of Hours and Earnings (2013)

	Groundwater Quality			WFD Groundwater Classification Status and Objectives
ronment	River quality			WFD River Basin Districts Cycle 2 (Draft) WFD River Waterbody Catchments Cycle 2 (Draft)
Natural Environment	There are eight SSSIs in Gateshead: in 2013 one was in favourable condition, one in unfavourable recovering condition, and two in unfavourable declining condition.			Natural England monitoring data
	There are 127 Local Wildlife Sites in Gateshead (at March 2013)			Local authority monitoring data (AMR)
	Ha of open space			Open Space and play survey
	Quality of open space			Open Space and Play survey
a	There were around 28 recorded criminal offences per 1,000 residents in Gateshead in 2014		North East: c35 offences per 1,000 population England: c42 offences per 1,000 population	Neighbourhood Statistics (2014 crime data); ONS 2013 mid year population estimates
Crime	Fear of crime Furthermore, 97% of Gateshead residents feel very or fairly safe in their neighbourhood.36 This is on par with the average for residents of Northumberland and Tyne and Wear.			JSNA 2014
Housing	58.2% of Gateshead's households are owner- occupied, 12.5% are private rented, 28% social rented (in 2011)	The proportion of housing that is private rented has almost doubled since 2001	N. East         England           Owner – occupied         61.8%         63.4%           Private rented         13.7%         16.8%           Social rented         22.9%         17.7%           Other         1.6%         2.1%	2001 and 2011 Census data
noН	There are approximately 92,591 dwellings in Gateshead. Around 60% of stock is owner-occupied; 30% rented from the Council or Registered Providers; 7% Private Rented; 0.5% shared ownership.			Gateshead Housing Strategy 2013-18.

Affordable Housing provision		
Based on the latest monitoring data (Apri there were approximately 536 completi 2013/14. Of these, approximately 133 uni affordable, comprising approximately 70 rented units and 63 intermediate housing This represents over half of the annual co NewcastleGateshead target of 242 dwellin SHMA, paragraph 10.3.6, page 72)	ons in ts were social g units. mbined gs (2013	Annual Monitoring Reports/Completions monitoring data
Nearly 22,000 properties are managed b Gateshead Housing Company (TGH

Minerals	Gateshead has no operational mineral extraction, processing or landing sites at present. There are two sites classified as dormant.	Following the closure of Blaydon and Crawcrook Quarries in Gateshead, without further provision production of sand and gravel, Tyne and Wear will be entirely dependent upon production from Eppleton Quarry in South Tyneside.  Additional areas for working will be needed to avoid reliance upon only one sand and gravel quarry in Tyne and Wear, make an appropriate contribution to local and regional need, and in order to avoid limiting the scale of future production to that below the production capacity of Eppleton Quarry.		-Annual Aggregates Monitoring Report 2012 (2013) -Local Aggregates Assessment 2013 UDP, Saved Policies, 2012

	6 sites are safeguarded for sand and gravel, Gateshead Wharf in East Gateshead is safeguarded for the landing and processing of sand and gravel and brick making clay is safeguarded at Lamesley	The extent of inferred mineral resources within Gateshead - all production of sand and gravel is derived from superficial or "drift" deposits comprising glacial sand and gravel and river sand and gravel. River sand and gravel deposits lie along the river Tyne from Crawcrook to Dunston and in the Derwent Valley area of Gateshead.  There are concealed sand and gravel deposits in the area of north and north east of Blaydon, including Stella and along the Derwent Valley. The main deposits of sand and gravel are glacial and lie in deposits at and around Highfield, Rowlands Gill, Sunniside, Hedley Fell, Ryton and Crawcrook.  The site at Lamesley represents the only deposit of brick Clay suitable for brickmaking in Tyne and Wear.		-UDP, Saved Policies, 2012 - Mineral Resource Information for Development Plans: Northumberland and Tyne and Wear (2000) Tyne and Wear Minerals Plan 1989
ste	Proportion of household waste that is recycled	Gateshead is currently recycling 34.6% of household waste	In comparison, Sunderland is recycling 31.3%, South Tyneside 33.8% and North Tyneside 35.1% of household waste. Flood Risk	Tidal Flood Risk  Along the River Tyne flood risk affects:, Derwenthaugh (including functional floodplain at the Hurrocks and West of Derwenhaugh Road), Swalwell, Dunston including Metrogreen and Teams and parts of the Gateshead Quays.  Fluvial Flood Risk  Along the River Team flood risk affects parts of Team Valley Trading Estate, Teams Lamesley (including functional floodplain) and a small part of Birtley.  Along the River Derwent parts of Blaydon, Swalwell, Derwenthaugh, Lintzford and Blackhall Mill are at risk  Functional floodplain occurs along the River Don at the edge of Follingsby Park.  Critical Drainage Areas Blaydon West, Birtley, Derwenthaugh, Dunston Hill, Dunston & Lobley Hill, Team Valley, Felling, Leam Lane, Wardley & Bill Quay.  Surface water hotspots include: Kibblesworth, Rowlands Gill, Leam Lane, Ryton, Blaydon, Derwent Haugh, South of Lobley Hill, Dunston and Old Fold, Sunniside and Clara Vale.	The main rivers River Tyne, River Team and River Derwent are the primary sources of flood risk in the area. There are several smaller tributaries which are also sources of flooding including the Black Burn, Lady Park Burn and Coltspool Burn. The Tyne estuary and the lower Derwent are influenced by a combination of tide and fluvial events, although the tidal influence is the predominant source. Surface water flood risk has been identified across the borough within a number of hotspots. It often occurs in hillier rural/urban fringe area such as Kibblesworth, Rowlands Gill, Leam Lane, Sunniside and Clara Vale. Ground water and sewer flooding tends to be localised  There have been four major recent flooding events in Gateshead: March 1979, November 200, September 2008 and June 2012. These were from a variety of sources.  Gateshead has 282 properties located in flood zone 3 and 860 properties located in flood zone 2.  Around 400 properties were flooded in June 2012.
